THE TRAINING

Embark on a journey to AI literacy with our "Awakening AI Understanding - AI Awareness" one-day intensive training.

AI is advancing fast, so staying ahead means understanding the basics and beyond. This program provides the groundwork, ethical considerations, and security measures needed for any AI-driven environment to thrive and grow responsibly and successfully.

FOR WHOM?

For organisations, employees and managers who:

- Hear a lot about generative AI and feel worried and excited at the same time.
- Want to know more about what AI means and what it can do for the organisation.
- Wish to acquire hands-on experience in how to use AI tooling.
- Want to know how to use AI in a responsible way.

WHAT WE WILL COVER

AI Ethics And Bias
Delve into crucial conversations about fairness, accountability, and the ethical considerations in AI.

Basics Of AI Engineering
Grasp foundational knowledge of algorithms, data, and the technical backbone of AI systems.

Prompt Engineering In GPT Models
Understand and experiment with prompt design, ensuring effective interaction with GPT models.

Security And Privacy In AI
Explore essential principles and practices to safeguard data and privacy in the utilization of AI technologies.

RESULTS

- Knowledge about AI
- Hands on experience with AI tools
- Directly applicable AI knowledge and skills that increase your productivity

DELIVERABLES

- Quick reference card for prompt engineering
- Course material
- The AI Apprentice certificate
