THE TRAINING

Advance your AI knowledge and skills with this applied AI program designed to get you ready to start implementing AI in your organisation, while being aware of the risks and security aspects of incorporating it into your operations.

Participants will become AI pioneers, equipped with in-depth AI knowledge and practical skills.

FOR WHOM?

For organisations, employees and managers who:

- Already have AI knowledge.
- Want to know more about applying AI and implementing it in their organisation.
- Want hands-on experience in how to use AI tooling and how it could integrate into their landscape.
- Wish to understand how to use AI in a responsible way.

WHAT WE WILL COVER

Hands-On With GenAI

Dive into practical exercises utilizing general AI (GenAI) tooling, exploring real-world applications.

Developing AI Solutions

Engage in creating AI models and understand the lifecycle from problem identification to solution deployment.

AI In Action

Work on case studies that illuminate the practical deployment of AI in various industry scenarios.

Managing AI Projects

Gain insights into the intricacies of managing AI projects efficiently from conception through to realization.

RESULTS

Knowledge about implementing AI with the implementation chart ■ Hands-on experience with AI solutions ■ Insights in how to utilise AI use cases in your organisation ■ Advanced skills in using AI tooling

DELIVERABLES

AI implementation chart ■ Course material ■ AI Practitioner Certificate

WHO WE ARE

Judith Van Hoof – CEO

Judith is a transformation leader and has been working in the change and transformation field for over 15 years. With a master of Science degree in Organisation Sociology, understanding processes and people is her expertise.

She has guided big and small organisations in their Digital and Agile transformations and is an inspirational trainer and speaker.

Andre Van Haaften – CAIO

Andre is a seasoned IT professional who has evolved from a support engineer to a freelance senior specialist focusing on automation and collaboration. He excels in implementing AI-driven solutions, optimizing workflows, and transforming organizations.

With expertise in platforms like SharePoint, Andre guides teams through process-level transformations, empowering businesses to thrive in the digital age. His dedication, deep understanding of cutting-edge technologies, and passion for enhancing productivity position him as a dynamic professional ready to drive positive change for organizations.
