THE TRAINING

The Thought Leader Training is meticulously designed for organizational leaders who guide teams toward achieving their objectives, without direct involvement in the production process.

This 2-day training focuses on empowering managers with the necessary knowledge and skills to effectively steer their teams in the right direction with AI.

FOR WHOM?

For managers and leaders who see the huge potential of generative AI and want to know more about what it means and what it can do for their organisation, but are also aware of the risks of generative AI and wish to learn how to set the proper guardrails.

WHAT WE WILL COVER

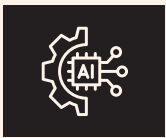

Understanding AI

Gain a basic understanding of AI, its history, applications, and future potential. Demystify common AI terminologies and concepts.

The Role Of AI In Your Industry

Explore case studies and real-world examples of AI applications in your specific industry. Learn about the best practices and common pitfalls in AI implementations.

Leading Teams In An AI-Driven World

How to enable the AI mindset and culture change in your organisation, understand the dynamics and challenges of leading teams working on AI projects, and develop strategies to effectively communicate AI concepts to your team, aligning AI projects with organizational objectives.

Ethics And Governance In AI

Dive into the ethical considerations and governance frameworks associated with AI. Learn how to establish a culture of responsibility and ethical AI usage within your team.

RESULTS

- Inspiration about what AI can bring
- Concrete steps you can take to enable and implement generative AI in your organisation
- Best practices and common pitfalls to use for your benefit

DELIVERABLES

- A template for an AI governance framework
- AI implementation chart
- Course material
- The AI Thought Leader certificate

ABOUT US

Judith Van Hoof – CEO

Judith is a transformation leader and has been working in the change and transformation field for over 15 years. With a master of Science degree in Organisation Sociology, understanding processes and people is her expertise.

She has guided big and small organisations in their Digital and Agile transformations and is an inspirational trainer and speaker.

Judith partners with the best AI and transformation experts for each project and training, chosen from her vast network of professionals according to each client's goals and needs.
